PROCUREMENT
SOLUTION

ABOUT A2Z

A2Z Procure is a unified digital procurement and project management platform that enables governments and enterprises to plan, source, procure, contract, and monitor projects seamlessly from a single interface.

Built on an enterprise-grade, modular, and microservices-based architecture, it integrates end-to-end processes — from tendering and supplier management to contract execution and performance tracking.

VISION:

To build a unified digital platform that empowers government and private entities to efficiently plan, procure, and manage projects with complete transparency and control.

MISSION:

To digitally transform procurement through automation, integration, and real-time analytics — ensuring accountability, visibility, and operational excellence across every stage of the procurement lifecycle.

THE PROBLEM IT SOLVES

Solving Procurement Fragmentation through Unified Digital Processes

Fragmentation – disjointed systems and siloed workflows.

Manual inefficiencies – paper-based approvals, repetitive data entry, and delays.

Compliance & audit challenges – limited traceability and inconsistent adherence to regulations.

A2Z Procure eliminates these pain points by unifying all processes into a single intelligent ecosystem.

IMPACT

- End-to-end workflow automation from planning to payments
 - Centralized data and analytics for faster, informed decisions
 - Compliance-ready framework with audit trails and reporting
 - Real-time visibility across all processes
- Seamless integration capabilities.

WHAT WE OFFER

Procurement Planning & Indent Management

Plan, initiate, and approve procurement requirements with multi-level approvals and budget allocation.

E-Tendering Management

Complete online tender lifecycle management from creation to award with automated evaluation.

Contract Lifecycle Management

Manage contracts from drafting to closure with e-signatures, version control, and renewal alerts.

Contract Monitoring & Works Management

Real-time tracking of contract execution, milestone monitoring, and quality inspections.

Supplier/Vendor Management (SRM)

Centralized vendor onboarding, empanelment, performance monitoring, and compliance checks.

Purchase Order & Catalogue Management

Catalog-driven purchasing with automated PO generation and approval workflows.

E-Auctions

Dynamic bidding environment with forward/reverse auctions and tender-cum-auction formats.

E-Payments & Finance Integration

Seamless financial transactions with GSTN, PFMS, and ERP integration for compliance

DEPLOYMENT MODELS

Flexible Options for Every Organization

SaaS

- Quick onboarding
- Pay-as-you-go model
- Cloud-hosted with continuous updates

ENTERPRISE SOLUTION

- Custom deployment (on-premise or private cloud)
- Integration with existing systems
- Tailored workflows and user policies

HYBRID

- Combine SaaS flexibility with on-premise control for scalability and compliance
- Seamless integration with existing ERP and legacy systems
- Enables phased adoption and optimized performance across environments

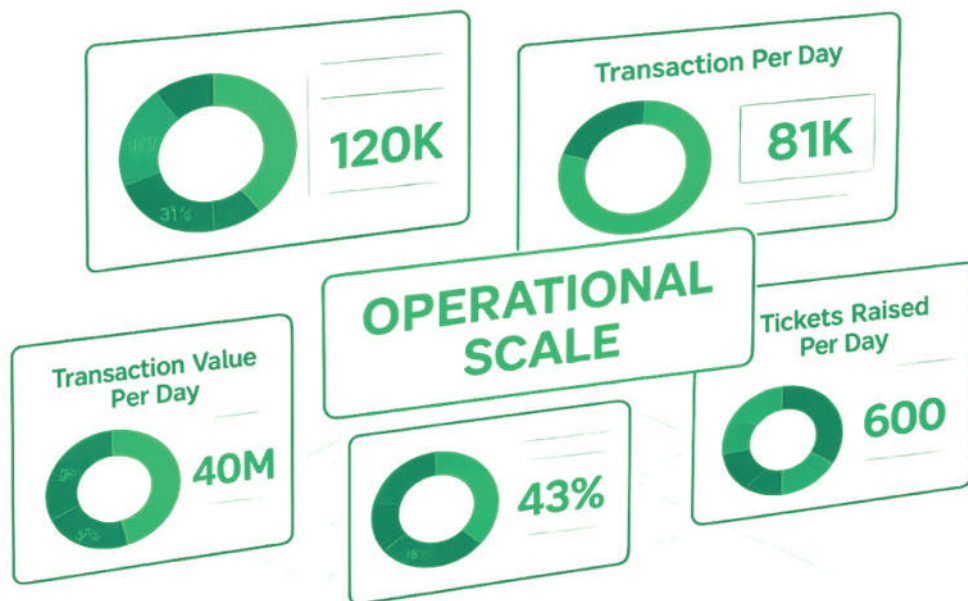

SUPPORT & MAINTENANCE

- 24/7 technical support with SLA-backed response times
- Regular updates, security patches, and version upgrades
- Dedicated account manager and proactive system monitoring

OPERATIONS SCALE

Our platform efficiently manages high-volume transactions and a growing user base across multiple e-Governance projects.
